

CHIPPED WOOD AND OTHER PRODUCTS SORTING PLANT

USE

The function of the selector is to separate in a short time the fines and coarse parts present in the product to be treated. The product is calibrated depending on the grid that is installed.

MANUFACTURE

- Metal sheet with thick width galvanised metal sections support framework
- Hemmed edge metal sheet tank, bolted among the various elements that make it up
- Product inlet hopper.

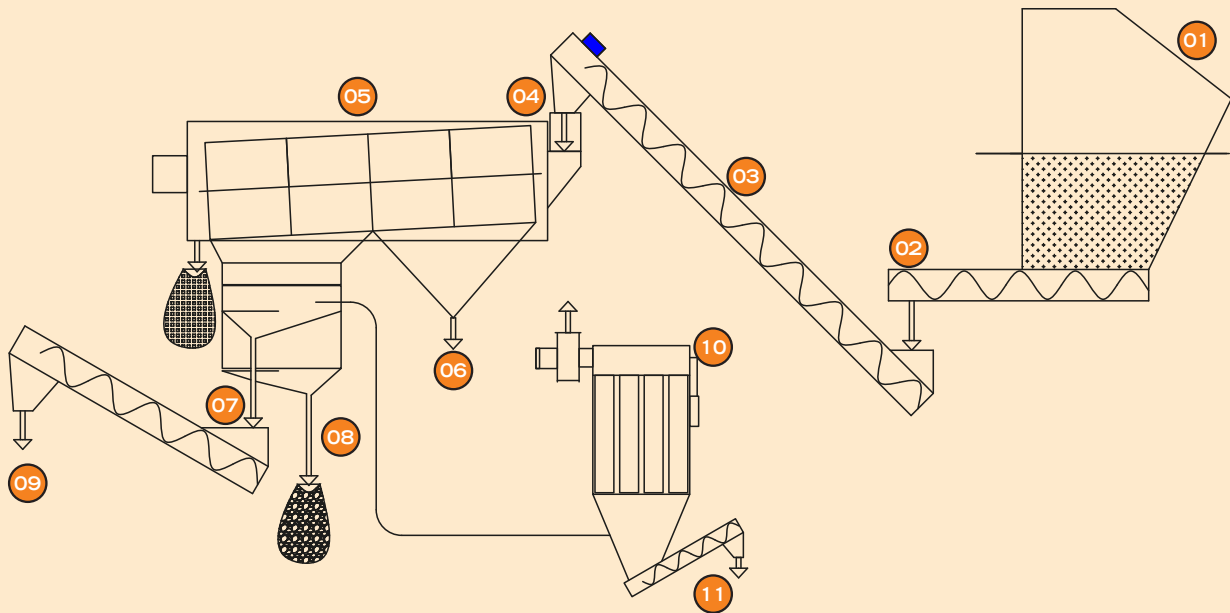

OPERATION

It is the combination of a rotating drum cleaner in the part underlying a suction cleaner with decanter and a dust abatement bag filter. A control panel allows adjusting the machines according to the product to be processed with positioning of the inclination of the drum, rotation speed and suction adjustment, all automatically. This plant is easy to transport with forklift or alternatively on wheels.

DETAILS

- 01) Calibrated product extraction auger
- 02) Plant view including loading hopper, calibrator, stone remover and filter
- 03) Wood chips, various sizes
- 04) Stone remover
- 05) Sub-products collection hopper
- 06) Other type of product to be selected
- 07) Other type of product to be selected

LEGEND

- 01) Loading hopper
- 02) Extraction auger
- 03) Conveyor auger
- 04) Iron remover
- 05) Rotating calibrator drum
- 06) Fines waste outlet
- 07) Good product outlet from stone remover
- 08) Stones outlet from stone remover
- 09) Finished product unloading auger
- 10) Bags filter
- 11) Filter dust unloading auger
