

LUMP BREAKER

The lump breaker is the ideal solution for breaking materials that tend to form lumps. The fast rotation of special knives through a fixed grid determines the shredding of the lump. The presence of two rotors allows obtaining high capacities.

CONSTRUCTION

- Gear-motor or upon request variable speed motor
- Chain drive
- Gear referral transmission
- Carbon steel
- AISI 304/316L

MODEL	PRODUCTION m ³ /h	POWER kW	WEIGHT kg	A	B	C	D	E	F	G
